<i>/KEITH D. HENDRICKS/ Supervisory Patent Examiner, Art Unit 1794</i>			

Continuation of 3. NOTE: Applicant restates many of the same arguments from the Amendment filed 12-14-07. However, as was recited in the Final Rejection of 3-20-08, Applicant has not shown that the prior art articles would not contain the Ti/Al intermetallic in the recited phases as claimed. Applicant argues that the prior art does not contain the Ti-Al intermetallic compound at more than 10% among the claimed phases, that the Ti-Al intermetallic have a size less than 10 microns in the plating bath, or that Ti is dissolved as a supersaturation for crystallizing as Ti-Al intermetallic compound or is added as Ti-Al intermetallic powder in the plating bath, however these arguments are not commensurate in scope with the claims. As such, Applicant's request for reconsideration has not placed the application in condition for allowance. The amendments to the claims creates new combinations which were not previously considered that would require further consideration and/or search. Present claims 1 and 2 have the limitation from claims 5 and 6, respectively, added by amendment. As such, claims 7 and 8 which had not previously depended from claims 5 or 6 or claims containing the recited limitations create new combinations not previously considered..
